

## WHEAT ADVANCES EARLY IN THE WEEK

Later It Weakens—Diminishing Stocks and Talk of July Deal Offset by Better Weather and Good Crop Reports.

New York, June 12.—There was a strong trend in domestic wheat markets early in the week. July contracts advancing much more rapidly than the distant deliveries. Light offerings and fairly brisk buying were reported to be the cause of the advance. The market was partly to the lighter world's shipments and the resultant heavy decrease in the quantity on passage. Unfavorable State reports from Kentucky and Missouri helped to strengthen the market. The latter was represented to be accumulating a long interest in July. It is claimed that their attitude is largely based on the light receipts at primary points, small deliveries by farmers at country stations and reports that farmers are refusing to accept current bids.

The upturn was checked by the advent of much better weather in the West. The temperature being materially higher in both the winter and spring wheat territory, with moderate rainfall in parts of the Northwest. Unfortunately, the precipitation was light nearly all over the Dakotas, where moisture was needed. There is no need for alarm, however, as the roots of the plant in that territory are stronger because of the moisture in the subsoil.

In the last half of the week there was much irregularity and unsettledness in general the trend was slightly downward, particularly for the distant deliveries. July held comparatively firm, and its premium over September widened in nearly all markets. At Chicago, sellers of July for the decline showed anxiety to cover, owing to the light receipts and the big reduction in contract stocks. Deliveries into consumptive channels having been exceedingly liberal. Many traders gave heed to rumors to the effect that several big professionals were accumulating a long line, and there were many observers who inclined to the opinion that a July deal might be attempted.

The general downward trend was partly due to the tendency among the majority of speculators to put a bearish interpretation upon the monthly crop report of the Department of Agriculture, but such interpretation was by no means concurred in generally, as it was largely founded on the fact that the spring wheat area was extraordinarily large. The figures being the largest on record. Unfortunately, this was in a measure counterbalanced by the fact that the condition was lower than a year ago, being 92.5 against 95.2. This condition suggests a probable production of 275,362,000 bushels, but it is probable that the July report will indicate a slightly larger total, because the weather in the Northwest since June 1 has been favorable, the higher temperature and much needed rains having been highly beneficial.

These influences were in some respects nullified by the lower winter wheat condition, which suggests a probable yield of 121,012,000, against 116,565,000 harvested last year. The combined totals give an aggregate of 396,374,000 bushels, or, roughly, 350,000,000 bushels less than last year, and therefore it is somewhat difficult to see how such a report could be considered bearish, particularly when it is taken into consideration that it will require more than 600,000,000 bushels for food and seed.

Many of the largest surplus-producing winter wheat States have the lowest conditions, namely: Kansas, 67, against 75 a year ago; Nebraska, 66, against 71; Missouri, 72, against 81; Illinois, 71, against 75. High conditions are either in States on the Pacific Coast or in small Eastern States that have little surplus for shipment. It is contended on these premises that short sellers of July may find available supplies decidedly small when they endeavor to cover.

Depression in the market towards the close was partly the result of favorable harvesting returns from the southwest, where the yield and quality of the grain are proving better than expected. Weakness was especially noticeable in the Northwestern markets. Advances from there indicated that recent rains have brought about much improvement. Selling was stimulated in part by discouraging cables, European markets being influenced by rather larger exports from Argentina than expected, and by fairly big offerings for forward shipment from Argentina and Canada.

Corn Advances, Then Falls. There was a strong rising tendency in the speculative corn market early in the week. The offerings were light, and sellers for the decline anxious to cover, prompted by reports that, owing to the unreasonably cold and wet weather, seed had rotted in the ground. This has made replanting necessary in many instances. Receipts at primary points were small, farmers showing unwillingness to accept current bids. Later in the week the market became quieter and less buoyant. In fact, there was a slight recession in the late trading, which was attributed partly to long taking in profits prompted by more cheerful reports from the West, where the weather was much milder.

Of the prompt puncturing of squares by the female weevil, and if this injury to the first squares spreads to other States it will cause alarm in the market, as it will mean a considerable cutting down of the original acreage planted. The bull side will make much use of reports of this character because it appears to be convinced that this is a bull weevil year, and that the insect will be one of its most powerful weapons. Weevil damage already has resulted in lowering crop estimates for both Louisiana and Mississippi.

The weather this week to be favorable must be clear, dry and hot. It must be clear because weevils thrive in cloudy weather, and it must be hot because heat is not good for the young weevil, and also because the plant needs heat now to make up for the loss of the original acreage. It must also be dry, because the farmer must be given an opportunity to get into the fields to complete chopping. Rain or cloudy and cool weather will have a tendency to put prices higher. This week will bring the first hot day for July near at hand, and the old crop positions in consequence will be easily moved one way or another until some strong developments come to light.

realization of a big crop of cotton this season, to cause cheaper cotton, and the revival of general business which is the hope of many manufacturers generally to get their mills back again on a paying basis to resume full time.

The new crop has been making such favorable progress in its development in all the Southern States the last three to four weeks that the situation and outlook have held out the promise of a big yield. Heavy rains in the last three days in Arkansas, Mississippi, Louisiana and Alabama, however, are now causing some apprehension of damage if they should continue much longer. The crop has had so much moisture that hot, clear weather,

## HANDSOME GIFTS FROM RICHMOND MAN

(Special to The Times-Dispatch.)  
Charlottesville, Va., June 12.—There were received at the University of Virginia yesterday, placed in the library a bust of Shakespeare and one of Newton, which make attractive additions to that beautiful and impressive room. They are the gift of a Richmond alumnus—the latest for he has presented many valuable things to his alma mater—whose name is withheld at his own request. It is a name known and honored far and near.

The Edward Thompson Company prize for the best thesis by a member of the graduating class in the law school is awarded to Claiborne Ross McCormick, of Richlands, subject, "Subrogation of the Surety in Virginia." The prize is donated by the Edward Thompson Company, of Newport, N. Y., and consists of a set of the second edition of the American and English Encyclopedia of Law (32 volumes), of the estimated value of \$240.

Robert Brooke Albertson, of Portsmouth, has been appointed by the General Athletic Association of the University, editor-in-chief of College Topics, the semi-weekly publication of the G. A. A. for next year. Walter Howard Kelly, of Pittsburg, Pa., will be assistant editor, and Frederick Woolford Conway Webb, of Vienna, Md., business manager. The editor-in-chief will appoint the rest of the staff from applications received next fall. Mr. Albertson has been in the university three years, and holds from Portsmouth, where he has had quite a record of excellence in newspaper work. He is now in the law school.

Henry Rozier Dulany, Jr., of Upperville, has been elected manager of the university baseball team for next season, and will have as his assistant Thomas Clay Carter, Jr., of Meridian, Miss. Mr. Dulany is a student in the law school, while Mr. Carter has spent the past two seasons in the college department.

cedar booth in one corner of the room fruit punch was served in the intermissions of the dance, and in another corner was the most striking arrangement of all, a fountain that played all the evening, with a centre of electric lights in United globes, mirrored in a pond of water, where live fish were swimming.

B. T. Ashby, of Culpeper, with Miss Cary Brooke, of Roanoke, led, and in one of the many pretty figures favors were given, college pennants for the men and American Beauty roses for their partners. As a last farewell to the class of 1910 the lights were lowered, and above the strains of "Home, Sweet Home," "Taps" was sounded and the words of one of the Techs' bugle poems thrown on the wall. Supper was served in the dining hall. Among the chaperons present were the president of the institute and Mrs. Barringer, members of the faculty with their wives and visiting women.

Among the sixty couples dancing were Miss Nannie Hall, Richmond, and Mr. Palmer; Misses Blackburg, Sulphur, and Mr. Saunders; Miss Virginia Vawter, Blacksburg, and Mr. Spindle; Miss Margaret Barringer, Blacksburg, and Mr. Vawter; Miss Mary Louisa Washington, and Victor Barringer; Miss Cantney Venable, Chapel Hill, and Mr. Sutton; Miss Micon and Mr. Sytan; Miss Eoff, Christiansburg, and Mr. Shackelford; Miss Katie Miller, Westville, and Mr. Hawkins; Miss Louise Hoge, Blacksburg, and Mr. Leavelle; Miss Lizzie Hoge and Mr. Sierra; Miss Bessie Austin, Roanoke, and Mr. Hurt; Miss Mary Jennings, Roanoke, and Mr. Graveley; Miss Elizabeth Hairston, Roanoke, and Mr. Stafford; Miss Rosa Jackson, Amelia, and Mr. Jackson; Miss Clemmer, Staunton, and Mr. Mackay; Miss Ellen Waldorf, Norfolk, and J. C. Berkeley; Miss Harris, Bedford, and Mr. Harris; Miss Bessie Dillard, Chatham, and Mr. Winston; Miss Nita Axon, Honaker, and Mr. Painter; Miss Stephenson, Sweet Briar, and Mr. Marshall; Miss Jordan, Radford, and Heath Robinson; Miss Edwards and Mr. Marchant; Miss Mayo, Blacksburg, and G. J. Berkeley; Miss Lillian Sweet Briar, and Mr. Gibbs; Miss Irvine, Sweet Briar, and Mr. Baum; Miss Anna Barringer, Blacksburg, and P. H. Thompson; Miss Mary Henderson, Blacksburg, and Mr. Hale; Miss Elizabeth Carter, Giles, and Mr. Eady; Miss Lena Roberts, Fries, and Mr. Crabb; Miss Elizabeth Smith, Staunton, and Mr. Walker; Mrs. Burkhardt, Blacksburg, and V. D. Hodgson; Miss Rosalie Stockard, Columbus, Miss, and Mr. C. H. Black; Miss Black, Blacksburg, and Mr. Harvey; Miss DeJarnette, Norfolk, and Mr. Stuart; Miss Sallie Howe, Radford, and Mr. Porter; Miss Waugh, Galax, and Mr. Waugh.

Junior-Senior German at V. P. I. (Special to The Times-Dispatch.)  
Blacksburg, Va., June 12.—Out of all the other classes' has been the motto of the juniors at V. P. I. for weeks, the keynote of their plans in arranging for the junior-senior german given Friday evening last, and also the first dance of commencement week. The decorations alone would have won them the coveted honor, for the forest being despoiled and the genius of the electrician called in to effect a decorative scheme that would mark the occasion. In the primary market the reaction prevails that reaction is close at hand.

Original, worked out in artistic design, was predominant. Feathered around the walls and over the windows and doors was running cedar in the greatest profusion, a curtain of the same hid the large stage from view, and clusters of colored lights, in glass and college colors, forming words and numerals telling who the hosts and guests of the evening were, gave the desired touch of color. From a huge

Banking centres at the West report that some progress has been made even in the reduction of loan accounts based on farm purchases, although that point in the situation, as well as the status of irrigation projects, still commands attention. The definite turn towards ease of the exchange money markets affords a gratifying supplement to the strengthened position in this country in view of the requirements which will have to be met in moving the coming harvest.

The government crop report for June 1 was taken as offering good promise of a wheat crop of upwards of 700,000,000 bushels, and the harvest is not believed to be threatened by the backwardness of the growing weather.
